

EMOJI™ SEATING

Patent Pending

EMOJI™ seating helps create a delightful experience for children and a refined, performance driven experience for adults. Each piece is designed to support us in how we move and find comfort at various ages as well as how we evolve from seeking playfulness to focus. Four sizes cover all ages and hold characteristics specific to the physical and skeletal needs of each.

THE DIFFERENCE

There's an innate difference when you specify Paragon Furniture. We're dedicated to designing safe and eco-friendly furniture that lasts. Our products are tested to meet and exceed ANSI/BIFMA certifications, we are committed to complying with MAS Certified Green criteria and our products are 100% assembled in the U.S.A.

- **Shell & Frame**
Seats are constructed using a gas-assisted process resulting in a lightweight, one-piece, plastic shell. Attached to the plastic shell is a welded steel, powder-coated, round tube frame.
- **Rubber Bumpers**
The underside of the shell is designed with rubber bumpers to protect chairs and surfaces from being scratched when stacked.
- **A Chair For Every Age**
At every age, EMOJI™ Seating is designed to support us. The child version is playful and soft, with a built-in smiley face to elicit a connection to joy and happiness. While support structure of the Adult chair more closely mimics the grown-up spine and pelvis. Different hole patterns in shell provide the right aeration for the age group, allowing body to breathe.

FEATURES

- **Two Base Options**
Available in two base options: 4-Leg and Cantilever.
- **Stacking**
Chairs stack up to six to allow for easy, compact storage.
- **Colors**
Available in 16 plastic and 5 frame paint colors.
- **Ships Assembled**

○ Glides or Casters

4-Leg seating is offered in glides or casters. Glide bottom material should be selected based on flooring type.

SENSORY ERGONOMICS

The human perception of comfort is affected by every aspect of our environment. EMOJI™ features and details were designed to generate a sensory response.

TEXTURE

We see with our hands. This means that what we touch and feel has a major effect on how we respond to things. Cold, rough, and sharp textures are all interpreted as uninviting conditions. EMOJI™ has textured zones to hold you firmly in your seat while you're sitting down and to keep rough areas away from where you touch. The human brain also responds exceptionally well when presented with a single, obvious place or method to grab, hold, or move something. The EMOJI™ is handle is a critical gesture of empathy to the human brain.

COLOR CONNECTION

Color can be used scientifically in architecture to promote certain types of behaviors or emotions in an environment. The human eye and brain can interpret color and generate an emotional or physical response based on the color itself. Bright primary colors, neons, and bright multi-colored patterns will generate excitement, increase awareness of overall surroundings, and heighten the mind's production of chemicals that increase energy and activity. Muted colors and monochromatic environments have the opposite effect. They trigger the release of chemicals in the brain that will promote relaxation and calm.

SOUND

Sound is an unlikely, but major source of disruption. Additionally, ambient noise is constantly requiring the ears and brain to interpret sound, which leads to fatigue by the end of the day. EMOJI uses rubber bumpers and quiet casters to minimize distraction.

LOOK.
TOUCH.
LISTEN.
