Well, there you are!
Thank you for finding us - we have so much to show and tell.

While we don't take ourselves too seriously, we do take quite seriously our mission:

To create inspirational learning experiences, stronger communities and a better world through educational furnishings.

Our relentless pursuit is to offer products that satisfy natural curiosity, solve problems, and overcome challenges, period.

Our product portfolio is diverse and applies to almost every square foot of interior educational space.

Most often, our furnishings provide comfort, utility and inspiration to students and teachers in Classrooms, Libraries, STEM/STEAM Labs, Maker Spaces, and Commons Areas. We are also present in Computer & Science Labs, Lounges, and Teacher Training Studios.

Well into our third decade, Paragon Furniture, Inc., headquartered in Arlington, Texas, serves the Educational Furniture market by making exquisitely designed and remarkably durable product solutions in an environmentally responsible way.

We are grateful for your interest in Paragon.

Ideal Environments for Paragon Furniture

Classroom • STEM/STEAM Lab • Maker Space • Library • Commons

Computer Lab • Science Classroom • Training Room • Café • Lounge

LIBRARY SHELVING

INFORMATION COMMONS

Information Commons or IC Shelving is a highly flexible and customizable shelving solution. Each run of shelves begins with a "Starter" and is followed by "Adder" units. Each section requires Side Panels to be ordered separately and the panels are available in several different materials – HPL, Metal, Acrylic. Many additional options are available for IC Shelving, so please consult a Paragon Customer Service or Sales Rep for more details on how to configure & order Information Commons Shelving.

COLOR GUIDE

How It Works

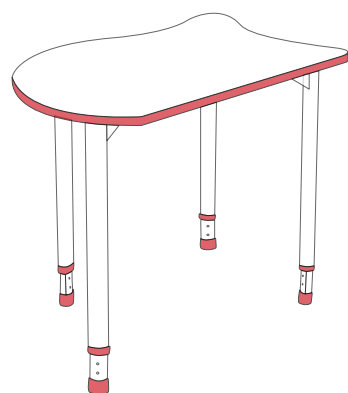

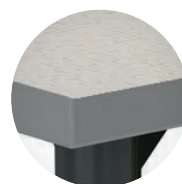

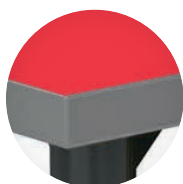

We may be black and white about how Paragon Furniture is the standard among all things furniture, but when it comes to color, we are a kaleidoscope. From Fire Truck Red to Vanilla Blue, your home for color options is Paragon®. This guide will walk you through each step of the process for choosing unique swatches for paint, accents and more.

Follow the steps outlined below to configure your Paragon® product. The image pictured will indicate in red what area of the product you are selecting a finish for.

STEP 1 WORK SURFACE

Work surface laminates are available in solid, woodgrain and pattern designs. Use page three of this guide as a reference when selecting laminates for work surfaces.

STEP 2 ACCENTS AND EDGE

Accents and edge details are selected from the same pallet of colors for a cohesive look.

STEP 3 FRAME

Frames are painted using a powder coat paint process that is durable and will withstand the rigors of the classroom and beyond.

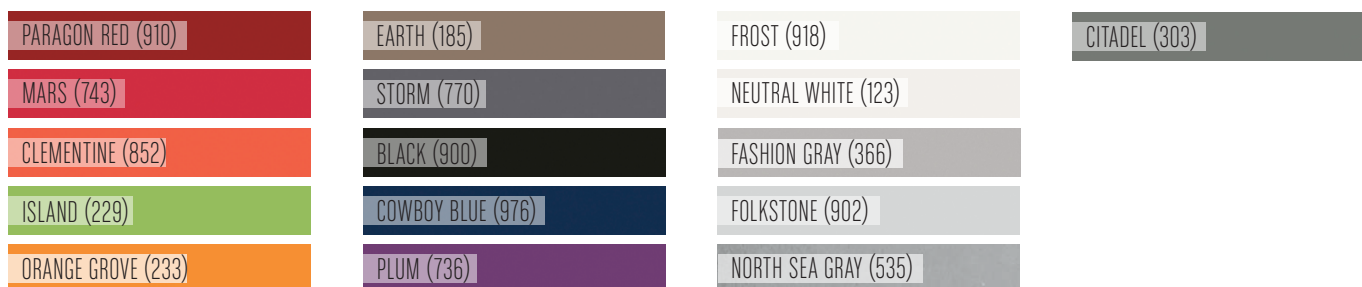

Differences between the printing process and production techniques may cause slight variations in the color swatches shown here and the actual manufactured product. We highly recommend requesting a sample of the finish for a more exact representation of the color. All samples are subject to availability at the time of ordering. Finish options are subject to change without notice. For samples, contact Paragon Furniture Customer Care at 800.451.8546 or email them at customerservice@paragoninc.com

Standard High Pressure Laminate (HPL) Colors

Solid Laminate

Enhance quietness and concentration using neutrals in warm and cool palettes or promote activity using colors that are bright. Coordinate or match work surface colors with edges, accents and frames to create an unique custom look.

Wood Grain Laminate

Achieve a classic or modern real wood look at the price and durability of laminate. Available with horizontal graining in light, dark and neutral shades.

Pattern Laminate

Subtle, abstract, bold and classic pattern laminates add the perfect finishing touch to any work surface.

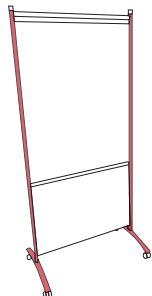

Whiteboard Laminate

+CR = Chemical Resistant
+PH = Compact-Phenolic
+PHC = Compact-Phenolic with Chemical Resistant Coating

SPECS

Paragon MAKER™ INVENT™ Tables are ideal for your next STEM or Maker lab. MAKER™ INVENT™ Tables are mobile and can be moved with the lesson. The work surface can be configured using laminate, butcher block, chemical resistant, phenolic and chemical resistant phenolic materials. The table has a reinforced base structure to accommodate the needs of Making. The sides of the base are equipped with small eyelet 1/4 inch holes that allow for tools and writing utensils to be stored using optional 1/8 inch and 1/4 inch peghooks. Two storage shelves are also located within the base and are accessible from either side of the table. Since today's Making involves the use of mobile devices and a variety of power tools, optional electrical access can be mounted to the table top and a side grommet provides cable management so cords don't get in the way. Pair MAKER™ INVENT™ tables with Paragon MAKER™ IDEA Boards for a comprehensive active learning environment.

- **Options:** The worksurface can be configured using laminate, butcher block, chemical resistant, phenolic, or chemical resistant phenolic materials.
- **Variety:** Tables can be ordered with a rectangle or clover-shaped worksurface in sitting or standing heights, and come with locking casters for easy mobility or glides for stationary applications.
- **Storage:** The sides of the tables are constructed using 16-gauge steel and is equipped with 1/4" holes on 1" centers designed for standard pegboard hook accessories.
- **Power:** Worksurfaces provide side cutouts for power cords to be managed and not hinder making.
- **Guaranteed:** Invent tables come with Paragon's limited lifetime warranty.

SPECIFICATION INFORMATION

LEG ASSEMBLY

Table legs are constructed using 16-gauge flat oval tubing for strength and support. Each leg secures with seven screws that thread to metal inserts in the underside of the tabletop. Tables with four 3" diameter casters, all with locking brakes.

BASE

The base is perforated metal powder coated metal constructed using 16-gauge steel secured to the leg assembly using hex bolts. Base is equipped with small 1/4" holes, which allows for tools and writing utensils to be stored using optional 1/8" and 1/4" peghooks. Maximum weight the base can support on each side is 75 lbs. Maximum weight per peghook is determined by the respective peghook manufacturer owners. Two accessory shelves are mounted to the base with 1/4"-20 bolts. Shelves are constructed using black melamine, a particleboard laminated with a thermally fused paper/resin coating to provide a durable hard surface, for the surface and a 3mm PVC for the edge. Maximum weight per shelf is 150 lbs.

WORK SURFACE

Work surface is available in two shapes; rectangle and clover. Work surface can be specified in 1 1/4" high pressure laminate (P), 1 3/4" Butcher block (BB), Chemical Resistant (CR), or Compact with Chemical Resistant (PHC) materials.

Butcher block is fabricated from wood strips not more than 1 3/4" wide. Finger joint material may be used in sizes over 72" long. Glued under pressure using Radio Frequency equipment. Finish is Durakryl 102, a UV cured polyurethane. Durakryl 102 meets or exceeds the K.C.M.A., NASI A161.1-1995 Performance & Construction Standard. Note: Mineral and other Natural occurring variations in color, grain, etc., are NOT considered defects. Butcher block is a 100% solid wood product. Just as no two trees are alike, no two butcher block tops will be identical. Phenolic is high pressure structural 3/4" thick laminate, built up from multiple layers of Kraft paper to produce a laminate in thicknesses of 3mm. It has a decorative face on both sides and is ideal for interior use. It is particularly suited to use in high humidity, high impact areas. With a density of 14.5kg/m² (for 10mm thickness), Phenolic is impressively strong and damage resistant and has remarkable structural stability.

Chemical resistant laminate is intended for application to interior surfaces where design, appearance, quality, durability, and resistance to relatively harsh acids, alkalis, corrosive salts, and other destructive or staining substances are required.

WORK SURFACE EDGE

Tables with a particle board core and laminate work surface will include a 3mm PVC, which runs the entire perimeter of the worksurface. Edges on tables specified with a butcher block worksurface will be sealed using Durakryl 102, a UV cured polyurethane. Compact core worksurface tables receive compact edge.

RECYCLED CONTENT

Metal components on the tables are constructed with steel that is comprised of a minimal 25% to 35% post-consumer recycled material. All steel components are completely recyclable at the end of the product life cycle.

FINISH OPTIONS

Steel components are painted using an environmentally powdercoat process.

ENVIRONMENTAL

Based on the test results, MAKER™ INVENT™ Table is compliant with MAS Certified Green criteria the performance standards established for low-emitting materials under the CDPH, the Collaborative for High Performance Schools (CHPS) and the LEED v4 general emissions criteria programs. Qualified project uses of the MAKER™ INVENT™ Table and all bracketed products may be eligible for credit points under the LEED and CHPS programs.

BIFMA AND ANSI TESTING

The MAKER™ INVENT™ Table met the acceptance level criteria for ANSI/BIFMA X5.5-2014 Desk Product Test Standard using the following test program.

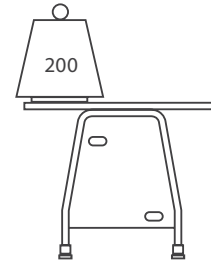

Stability Under Vertical Load Test

The table remained level with a placement load of 125 lbs on a 12" diameter disk 1" from the edge.

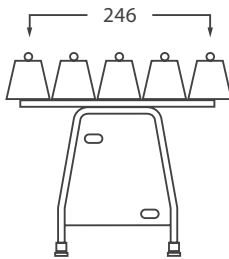

Horizontal Stability Test Desk/ Tables with Casters

The table remained level with a placement load of 25 lbs on a 8" diameter disk 1" from the edge with a horizontal force of 10 lbf.

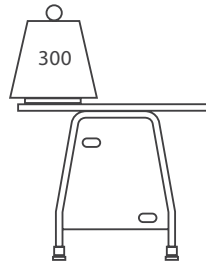

Concentrated Functional Load Test

The table remained level with a concentrated load of 200 lbs.

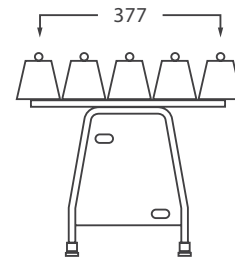

Distributed Functional Load Test

The table remained level with a distributed load of 246 lbs.

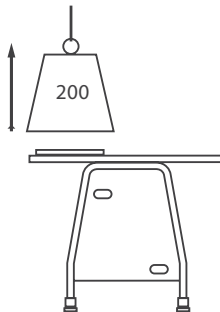

Concentrated Proof Load Test

The table remained level with a concentrated load of 300 lbs.

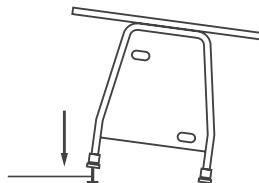

Distributed Proof Load Test

The table remained level with a distributed load of 377 lbs.

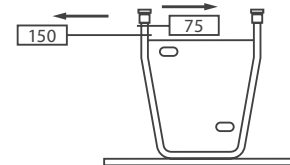

Top Load Ease Cycle Test

The table remained level with a placement load of 200 lbs on a 18" diameter disk 1" from the edge for 10,000 cycles.

Desk/Table Unit Drop Test

The table had no loss of serviceability when dropped from 4.7" H.

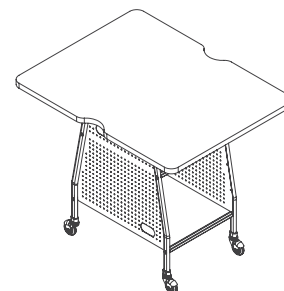

Leg Strength Test

The table had no loss of serviceability when legs were tested inward with 150 lbs static load or outward with 75 lbs static load.

MAKER™ SERIES IDEA BOARD

Often, activating an idea begins with a writing instrument and a blank surface. When working and learning in collaboration with others, a vertical, two-sided and mobile marker board assists with brainstorming, ideation, and expression. The Maker Series Idea Board can also serve as a nimble privacy partition.

Collaboration is essential to get ideas across and the best end results. Paragon MAKER™ Idea Boards offer a canvas for interactive learning, brainstorming, and connection. The double-sided dry erase finish, that is both a writing surface and magnetic, adds flexibility to any conversation. Equipped with small eyelet 1/4 inch holes, allows for tools and writing utensils to be stored using optional 1/8 inch and 1/4 inch peghooks. And when the discussion changes venues, boards easily move with it to the next location. MAKER Idea Boards can also offer a degree of privacy and separation among small groups within the same classroom. Combine MAKER™ Idea Boards with Paragon MAKER INVENT™ tables for your school's next generation STEM or Maker Lab environment.

- **Mobile:** Idea boards come with four twin-wheel locking casters for easy mobility. Upright tubes provide an easy grip for transportation.
- **Options:** Boards are magnetic double-sided, and can be specified with porcelain dry erase or laminate dry erase. Boards support most flip chart pads using chart hooks located at the top of the board.
- **Storage:** The bottom half of the board is constructed using 14-gauge steel and is equipped with small eyelet 1/4 inch holes which allow for tools and writing utensils to be stored using optional 1/8 inch and 1/4 inch peghooks.
- **Guaranteed:** Idea boards come with Paragon's limited lifetime warranty.

SPECIFICATION INFORMATION

BOARDS

Dry erase boards are offered with a porcelain magnetic dry erase surface on both sides or laminate non-magnetic dry erase on both sides. Boards have a gatorboard center with a protective aluminum barrier to prevent moisture from warping the board. Adjustable pegs are secured at the top of the board to hold most flip charts. Boards are mounted to the frame and leg assembly using ????

FRAME AND LEG ASSEMBLY

The frame and leg assemblies are constructed from welded 14-gauge steel tube and secure to the board and base using ??????. Frame and leg assemblies are finished in titanium powder coated paint. Four black, locking 2" (??cm) diameter twinwheel casters are included with each mobile board.

BASE

The base is a peg board powder coated metal constructed using 13-gauge steel secured to the frame and leg assembly using ????. It is equipped with small eyelet 1/4" holes, which allows for tools and writing utensils to be stored using optional 1/8" and 1/4" peghooks. Maximum weight the base can support on each side is ????. Maximum weight per peghook is determined by the respective peghook manufacturer owners.

RECYCLED CONTENT

Board frame, leg assembly and base are constructed with a steel that is comprised of a minimal 25% to 35% post-consumer recycled material. All steel components are completely recyclable at the end of the product life cycle.

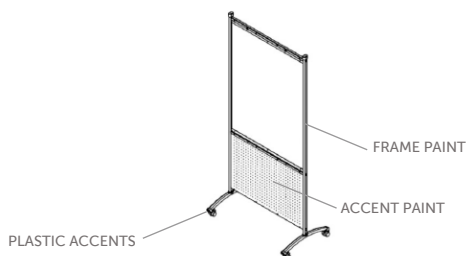

FINISH OPTIONS

Steel components are painted using an environmentally power coat process with 12 standard colors available.

ENVIRONMENTAL

Based on the test results, MAKER™ Idea Board is compliant with MAS Certified Green criteria the performance standards established for low-emitting materials under the CDPH, the Collaborative for High Performance Schools (CHPS) and the LEED v4 general emissions criteria programs. Qualified project uses of the MAKER™ Idea Board and all bracketed products may be eligible for credit points under the LEED and CHPS programs.

HOW TO ORDER

MAKER™ IDEA BOARD offers a canvas for interactive learning,

Example: 34" W x 20" D x 70 1/2" H Board; Titanium Frame Paint; Green Bean Accent Paint; Black Plastic Accents.

BIFMA AND ANSI TESTING

The MAKER[™] Idea Board met the acceptance level criteria for the following test program.

Side Panel Strength Test

The board remained upright passing the strength test at 75 lbs.

MOTIV[®] SEATING & TABLES

Designed to support countless configurations. With a wide variety of fabric, leather and power options, MOTIV[®] enables technologies and provides comfort and flexibility for any space. Available in freestanding or modular configurations. Add power to ensure devices stay charged and patrons stay productive.

MOTIV® Modular Soft Seating

Single Chair Armed with or without Tablet and/or Power on Right

Single Chair Armless with or without Tablet and/or Power on Right or Left

Single Chair Armed with or without Tablet and/or Power on Left

Single Bench with or without Laminate Top

30° Bench with or without Laminate Top

60° Bench with or without Laminate Top

90° Bench with or without Laminate Top

Double Bench with or without Laminate Top

MOTIV® Freestanding Soft Seating

Single Chair Armless with or without Tablet and/or Power on Right or Left

Single Chair Armed or Armless with Casters

Two and Three-Seat Sofa Armless with or without Tablets and/or Power on Right and Left

Single Chair Armed with or without Tablet and/or Power on Right or Left with or without Casters

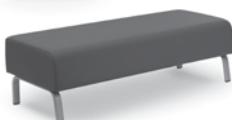

Stool Available at 15° or 20° height with Casters or Glides

Two and Three-Seat Sofa Armed with or without Tablets and/or Power on Right and Left

Single and Double Wall Bench

Midback Sofa with or without Power on Right and Left, Front and Back, with or without Shelf

Highback Sofa with or without Power on Right and Left, Front and Back, with or without Shelf

MOTIV® Occasional Tables

MOTIV® Occasional Tables are complementary to MOTIV® Soft Seating. Tables come in a laminate top and are offered in round, rectangle, or square shapes.

Put soft seating into an open area and watch interaction happen. With 120V and USB power options in any configuration, students can readily access information and each other to collaborate effectively. A range of modular options piece together to form the shape, grouping and energy desired.

- **Seating Options:** Comfortable armed or armless chairs. A variety of benches. We have a solution that's right for you.
- **Fabric Options:** Select from our wide variety of fabrics and leathers to create the ideal look for your space.
- **Power:** Optional 120V and USB power plates for chairs.

SPECIFICATION INFORMATION

CUSHIONING

Foam cushioning is engineered from polyurethane laminated panels for firmness, support, and comfort. Cushioning is certified to meet California Code 117. When covered in leather, sofas will have visible seams. Long benches and sofas will have one visible seam on vertical panel.

FRAME

A series of engineered 23/32" CC X plywood sections and panels are assembled to form a strong and supportive frame. All joints are glued and mechanically fastened. Engineered sheet webbing is stretched across the seat portion of the frame for flexible support. The foam is adhered to the wood structure and webbing. Fabric or leather is precision cut and upholstered cover is sewn by computer controlled machines. All steps ensure consistency from one model to another. All components used in the manufacturing of Paragon Furniture seating meet State of California Technical Bulletin 117 for fire retardancy. Seating that must meet California 133 is available by special order.

BASE

Base legs are constructed with 14-gauge flat oval tubing, which is formed using a CNC tube bender and features arc welded connections to the mounting plate. The leg assembly mounts to the underside of the seat with (3) 5/16-18 threaded bolts. Base legs can be finished in flannel (F), titanium (T), cool gray (O), wisdom (Z), black (B) Paragon Furniture standard powder paints. Plastic glides are utilized with all MOTIV® soft seating pieces.

TABLET

Tablet measures 15 1/2" x 14 3/4" W (39.37cm x 37.47cm), tapering to 10" L (25.40cm) on the small side. Tablet connects to tablet mechanism via an articulating mounting plate, allowing for full 360° rotation. Tablet comes standard with plastic cup holder that attaches to tablet mechanism directly beneath tablet. Cup holder is always finished in black.

TABLET MECHANISM

Tablet mechanism is a 1 1/4" anodized aluminum pivot pole that attaches to frame of soft seating unit with two (2) 5/16 - 18 x 3 1/4" socket head bolts. Metal components are finished in aluminum.

BENCH AND POWER BRIDGE FINISH OPTIONS

30, 60 and 90 degree benches can be constructed with all fabric on sides and top or be constructed with fabric sides and a hard work surface top. Power bridges can only be specified with painted sides and a laminate top.

BENCH AND POWER BRIDGE WORK SURFACE EDGE DETAIL

Benches and power bridges specified with laminate tops will feature edge detail, a 22.5. knife profile with a clear coat finish on exposed MDF.

POWER

Power modules include one AC Power (120V) unit and one USB unit. USB power receptacle features technology which allows it to detect the amount of charge that is required by a given mobile device and supply only what is needed, up to a full charge rate of 2.1 amps.

Power modules are available as a stand alone NEMA cord that plugs directly into the wall or as a daisy chain system that connects multiple modules off a single power source. Stand alone power modules are UL Listed and daisy chain power modules are UL Recognized and require the additional purchase of jumper cables and power in-feed manager. Stand alone power modules are rated for a maximum of 15 amps each, daisy chain power modules are rated for a maximum of 12 amps for the system.

Power module face plate offered in one finish option; Flannel (F). Power bridge power units include two complete modules comprised of one AC Power (120V) unit and one USB unit. Power cords exit MOTIV® chairs and benches and power bridges from the bottom located in the center back. Power cords are approximately 13 feet in length. All models of MOTIV® modular soft seating that include power include a cord bin. Modular soft seating that does not include power require the cord bin to be specified at time of order. Not For Use With GFCI Outlets - To avoid tripping of electrical circuits, only use Daisy chain Power components with non-GFCI (Ground Fault Circuit Interrupter) outlets.

POWER DOME

Benches with a laminate top are available with a 4-outlet power dome that provides access above the work surface. The power dome includes two 12' power cables that plug into a standard outlet or into a daisy chain power strip on daisy chain models. Power dome units are included with the order of the bench.

DIMENSIONS

Additional dimensions for chairs and sofas are as following:
 Arm height: 26"
 Seat height: 18"
 Seat depth: 20"
 Back height from seat: 36"
 Width between arms on chair: 21"
 Width between arms on a two seat sofa: 55"
 Width between arms on a three seat sofa: 75"
 Tablet height: 29"

ASSEMBLY

All MOTIV® ships fully assembled.

FABRIC

Paragon Furniture Grade-In Program has been designed to offer a host of benefits to customers for all Paragon Furniture upholstered products. Paragon Furniture has partnered with Momentum Group to offer hundreds of options that are now graded into Paragon Furniture price list. Customers simply pick a graded fabric, vinyl or leather pattern, grade and color, place an order with Paragon Furniture and Paragon Furniture will take care of everything else.

Material testing is no longer required. Color options as well as samples can be viewed and ordered through the Momentum Group's website at themomgroup.com. Multiple colors and pattern matching will require an upcharge. Customer Owned Material (COM) and Customer Owned Leather (COL) orders are still welcome. Neither COM nor COL materials are required to be tested, however customers will need to purchase their own material and send it directly to Paragon Furniture for the manufacturing process. Paragon Furniture offers all Momentum Textiles as a standard. Loomsource and Textus are not offered as a Paragon Furniture standard.

PATTERN ALIGNMENT AND MATCH

As a standard, fabric patterns will be aligned. For example, vertical stripes on the seat back will connect with the vertical stripes on the seat pan. Pattern match is when the pattern alignment applies to both vertical and horizontal lines throughout the entire sofa. Think plaids. The stripes have to match the seat back, the seat pan, and the inside of the arms. It is difficult (sometimes impossible) to achieve a perfect match in both directions and at every seam. When pattern matching is required, an upcharge is applied. We have provided on the following page a pattern repeat matrix to determine yardage. Alignment and matching will demand more fabric usage than is typically necessary with a solid color fabric.

FIRE CODES

All Paragon Furniture standard soft seating meets California TB117. Contact Customer Care for more information on California TB133. The customer will have to purchase one of any item being ordered to be subjected to the burn certification test, plus a fee for the test.

OPTION FOR CAL133 COMPLIANT

Item is produced with process and materials that meet the standard. An upcharge based on product, is applied.

OPTION FOR CAL133 CERTIFIED

Requires customer to purchase one of each item to be certified. An upcharge for each test is applied.

WARRANTY

Visit www.paragoninc.com for the full warranty statement.

Repeat Pattern and Fabric and Leather Requirements

Soft Seating models come standard using one upholstered fabric or leather. **Models specified with two or more fabrics or leathers, an upcharge of 10% is applied to the net price of the product.**

Fabric yardage requirements are based on plain 54" material. Leather requirements are shown in square feet and are based on hides that average a minimum of 50 to 55 square feet each.

Additional fabric or leather is required to match any pattern with matching repeats. For 54" material with a fabric pattern repeat, increase the fabric yardage requirements by the factor shown in the charts below. To determine fabric repeat pattern add the horizontal and the vertical measurements together. The total of the horizontal and vertical measurements should then be cross referenced to the **Fabric Repeat Pattern Cut** charts below. **Increase the Fabric Requirement By** the percentage indicated for that corresponding **Fabric Repeat Pattern Cut**. Increase leather footage requirements 15% when using hides smaller than 50 square feet.

Fabric and Leather Requirements

MOTIV® Modular Soft Seating	Description	Fabric	Leather
EDUMS300	Armless Chair	3 yds	54 sq ft
EDUMD560L	Chair Left Arm	4 yds	72 sq ft
EDUMD560R	Chair Right Arm	4 yds	72 sq ft
EDUMS350	Arm Chair	5 yds	90 sq ft
EDUMDB630	30° Bench	3.5 yds	36 sq ft
EDUMDB630W	30° Bench with Laminate Top	2 yds	36 sq ft
EDUMDB660	60° Bench	4 yds	72 sq ft
EDUMDB660W	60° Bench with Laminate Top	2.5 yds	45 sq ft
EDUMDB690	90° Bench	5 yds	90 sq ft
EDUMDB690W	90° Bench with Laminate Top	3.5 yds	63 sq ft
EDUMDB400	Single Bench	2.5 yds	45 sq ft
EDUMDB400W	Single Bench with Laminate Top	1.5 yds	35 sq ft
EDUMDB600	Double Bench	3.5 yds	63 sq ft
EDUMDB600W	Double Bench with Laminate Top	2.5 yds	45 sq ft

This matrix applies only to solid fabrics or fabrics with a railroaded stripe (stripes or pattern running across the roll, see Fig. 1). Any fabric pattern requiring two-way alignment, pattern matching, or special pattern location will require additional fabric and must be submitted to determine usage requirements. Yardage requirements are based on 54" wide roll goods.

Put soft seating into an open area and watch interaction happen. With 120V and USB power options in any configuration, students can readily access information and each other to collaborate effectively.

- **Seating Options:** Comfortable armed or armless chairs. A variety of benches. We have a solution that's right for you.
- **Fabric Options:** Select from our wide variety of fabrics and leathers to create the ideal look for your space.
- **Power:** Optional 120V and USB power plates for chairs.

SPECIFICATION INFORMATION

CUSHIONING

Foam cushioning is engineered from polyurethane laminated panels for firmness, support, and comfort. Cushioning is certified to meet California Code 117. When covered in leather, sofas will have visible seams. Long benches and sofas will have one visible seam on vertical panel.

FRAME

A series of engineered 23/32" CC X plywood sections and panels are assembled to form a strong and supportive frame. All joints are glued and mechanically fastened. Engineered sheet webbing is stretched across the seat portion of the frame for flexible support. The foam is adhered to the wood structure and webbing. Fabric or leather is precision cut and upholstered cover is sewn by computer controlled machines. All steps ensure consistency from one model to another. All components used in the manufacturing of Paragon Furniture seating meet State of California Technical Bulletin 117 for fire retardancy. Seating that must meet California 133 is available by special order.

BASE

Base legs are constructed with 14-gauge flat oval tubing, which is formed using a CNC tube bender and features arc welded connections to the mounting plate. The leg assembly mounts to the underside of the seat with (3) 5/16-18 threaded bolts. Base legs can be finished in flannel (F), titanium (T), cool gray (O), wisdom (Z), black (B) Paragon Furniture standard powder paints. Plastic glides are utilized with all MOTIV® soft seating pieces.

TABLET

Tablet measures 15 1/2" L x 14 3/4" W (39.37cm x 37.47cm), tapering to 10" L (25.40cm) on the small side. Tablet connects to tablet mechanism via an articulating mounting plate, allowing for full 360° rotation. Tablet comes standard with plastic cup holder that attaches to tablet mechanism directly beneath tablet. Cup holder is always finished in black.

TABLET MECHANISM

Tablet mechanism is a 1 1/4" anodized aluminum pivot pole that attaches to frame of soft seating unit with two (2) 5/16 - 18 x 3 1/4" socket head bolts. Metal components are finished in aluminum.

WALL BENCH FINISH OPTIONS

Benches can be constructed with all fabric on sides and top. Legs can be finished in any standard powder paint offered by Paragon Furniture. Note the Wall Bench is 20"D and does not coordinate with MOTIV® Double Sided Benches; Power Bridge; Chairs and Sofas.

POWER BRIDGE

The modular Power Bridge is available for use with MOTIV® Freestanding chairs, see MOTIV® Modular Soft Seating for specifications.

The Power Bridge is unable to be used with MOTIV® seating that incorporates casters or MOTIV® Sofas with tablet arms. The Power Bridge is an option for chairs that utilize a tablet arm but must be attached to the opposite side.

POWER

Power modules include one AC Power (120V) unit and one USB unit. USB power receptacle features Detect-Supply-Charge™ (DSC™) technology which allows it to detect the amount of charge that is required by a given mobile device and supply only what is needed, up to a full charge rate of 2.1 amps.

Power modules are UL Listed. Power modules are rated for a maximum of 15 amps each; however, to prevent nuisance tripping of the breaker, you should not exceed 12 amps of usage each for an extended period of time. Power module face plate offered in four different finish options: Flannel (F).. Power cords exit MOTIV® chairs and benches and power bridges from the bottom located in the center back. Power cords are approximately 13 feet in length. All models of MOTIV® modular soft seating, whether specified with power or without, include a cord bin to manage cords.

DIMENSIONS

Additional dimensions for chairs and sofas are as following:

Arm height: 26"
 Seat height: 18"
 Seat depth: 20"
 Back height from seat: 36"
 Width between arms on chair: 21"
 Width between arms on a two seat sofa: 55"
 Width between arms on a three seat sofa: 75"
 Width between arms on highback and midback two seat sofa: 50"
 Tablet height: 29"

ASSEMBLY

All MOTIV® ships fully assembled.

FABRIC

Paragon Furniture Grade-In Program has been designed to offer a host of benefits to customers for all Paragon Furniture upholstered products. Paragon Furniture has partnered with Momentum Group to offer hundreds of options that are now graded into Paragon Furniture price list. Customers simply pick a graded fabric, grade and color, place an order with Paragon Furniture and Paragon Furniture will take care of everything else.

Material testing is no longer required. Color options as well as samples can be viewed and ordered through the Momentum Group's website at thermomgroup.com.

Multiple colors and pattern matching will require an upcharge. Customer Owned Material (COM) and Customer Owned Leather (COL) orders are still welcome. Neither COM nor COL materials are required to be tested, however customers will need to purchase their own material and send it directly to Paragon Furniture for the manufacturing process. Paragon Furniture offers all Momentum Textiles as a standard. Loomsource and Textus are not offered as a Paragon Furniture standard.

PATTERN ALIGNMENT AND MATCH

As a standard, fabric patterns will be aligned. For example, vertical stripes on the seat back will connect with the vertical stripes on the seat pan. Pattern match is when the pattern alignment applies to both vertical and horizontal lines throughout the entire sofa. Think plaids. The stripes have to match the seat back, the seat pan, and the inside of the arms. It is difficult (sometimes impossible) to achieve a perfect match in both directions and at every seam. When pattern matching is required, an upcharge is applied. We have provided on the following page a pattern repeat matrix to determine yardage. Alignment and matching will demand more fabric usage than is typically necessary with a solid color fabric.

FIRE CODES

All Paragon Furniture standard soft seating meets California TB117. Contact Customer Care for more information on California TB133. The customer will have to purchase one of any item being ordered to be subjected to the burn certification test, plus a fee for the test.

OPTION FOR CAL133 COMPLIANT

Item is produced with process and materials that meet the standard. An upcharge based on product, is applied.

OPTION FOR CAL133 CERTIFIED

Requires customer to purchase one of each item to be certified. An upcharge for each test is applied.

WARRANTY

Visit www.paragoninc.com for the full warranty statement.

Repeat Pattern and Fabric and Leather Requirements

Soft Seating models come standard using one upholstered fabric. **Models specified with two or more fabrics, an upcharge of 10% is applied to the net price of the product.**

Fabric yardage requirements are based on plain 54" material. Leather requirements are shown in square feet and are based on hides that average a minimum of 50 to 55 square feet each.

Additional fabric or leather is required to match any pattern with matching repeats. For 54" material with a fabric pattern repeat, increase the fabric yardage requirements by the factor shown in the charts below. To determine fabric repeat pattern add the horizontal and the vertical measurements together.

The total of the horizontal and vertical measurements should then be cross referenced to the **Fabric Repeat Pattern Cut** charts below. **Increase the Fabric Requirement By** the percentage indicated for that corresponding **Fabric Repeat Pattern Cut**. Increase leather footage requirements 15% when using hides smaller than 50 square feet.

Fabric and Leather Requirements

MOTIV® Modular Soft Seating	Description	Fabric	Leather
EDUMS300 and EDUMB600	Armless Chair	3 yds	54 sq ft
EDUMS350 and EDUMB650	Arm Chair	5 yds	90 sq ft
EDUML400	Armless Two Seat Sofa	6 yds	108 sq ft
EDUML450	Armed Two Seat Sofa	6.5 yds	117 sq ft
EDUMC500	Armless Three Seat Sofa	7.5 yds	135 sq ft
EDUMC550	Armed Three Seat Sofa	8 yds	144 sq ft
EDUMWB400	Single Wall Bench	2.5 yds	45 sq ft
EDUMWB600	Double Wall Bench	3 yds	54 sq ft
EDUMH450	Highback Two Seat Sofa	11 yds	210 sq ft
EDUMM250	Midback Two Seat Sofa	10 yds	119 sq ft

This matrix applies only to solid fabrics or fabrics with a railroaded stripe (stripes or pattern running across the roll, see Fig. 1). Any fabric pattern requiring two-way alignment, pattern matching, or special pattern location will require additional fabric and must be submitted to determine usage requirements. Yardage requirements are based on 54" wide roll goods.

Repeat Pattern Requirements

CUSTOMER'S OWN MATERIAL. CUSTOMER'S OWN LEATHER & FABRIC GRADES

- Each USB power receptacle provides up to 2.1 amp charge per USB 2.0 charging specifications
- Please note, Paragon Furniture standard lead time may vary depending on fabric inventories with our suppliers at which time a representative from Paragon Furniture will contact you with the choice to use a readily available alternate to your fabric selection or you may choose to accept a revised lead time
- Shelf available in laminate finishes studio teal (103), xanadu (110), river cherry (566), folkstone (902), frost (918), black (900) or kensington maple (963)

HOW TO SPECIFY

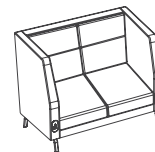

1. Determine MOTIV™ Model
2. Select paint color for frame, cord bin and handle, if applicable
3. Select laminate for any work surface, tablet or shelf
4. Select a fabric from Momentum at www.themomgroup.com, using their 5Clicks system or identify and purchase a fabric or leather from a textile manufacturer of your choice

The occasional table makes informal learning functional. The perfect compliment to the MOTIV® line of freestanding and modular soft seating, these tables come in round, square, and rectangle shapes and a variety of laminate surfaces.

- **Accommodating:** Tables come in a variety of shapes.
- **Options:** Tables come in a variety of sizes and laminates choices.

SPECIFICATION INFORMATION

TABLE BASE

Legs are constructed with 14-gauge flat oval tubing and feature arc welded connections to the mounting plate. The legs mount to the underside of the work surface with a metal-to-metal screw connection through a 3/16" thick steel plate. Each leg is angled 10° from attachment point toward the outer edge of the tabletop. Plastic glides attached to legs prevent floor damage.

WORK SURFACE

Work surfaces feature a 1" thick 45 lb. density high-pressure laminate.

WORK SURFACE EDGE

Tables with laminate tops will feature knife edge detail, a 22.5° knife profile with a clear coat finish on exposed MDF or edge band which will run the entire perimeter of the work surface.

FINISH OPTIONS

Tables can be ordered in any standard, laminate, and powder paint offered by Paragon Furniture.

CONSTRUCTION AND ENVIRONMENTAL TESTING

Using in-house or third party verification, many Paragon Furniture products are tested to meet or exceed the appropriate ANSI/BIFMA x5.5-2008 standards for durability and safety.

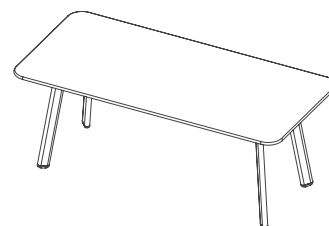

Edge options are environmentally preferred to polyvinyl chloride (PVC). PVC is constructed with chlorine and when burned omits toxic byproducts such as dioxins, chlorocarbons and hydrochloric acid. Additionally PVC is constructed using a significant amount of lead, which is highly toxic during the product life cycle and after disposal.

RECYCLED CONTENT

Tables are constructed with a steel base that is comprised of a minimal 25% to 35% post-consumer recycled material. All steel components are completely recyclable at the end of the product life cycle. Work surfaces with x have an MDF substrate constructed with an average of 70% recycled content.

EMOJI™ SEATING

EMOJI™ seating helps create a delightful experience for children and a refined, performance driven experience for adults. Each piece is designed to support us in how we move and find comfort at various ages as well as how we evolve from seeking playfulness to focus. Four sizes cover all ages and hold characteristics specific to the physical and skeletal needs of each.

EMOJI™ Seating P 5

Emoji™ 4-Leg Chair with Glides
Available in child, youth and adult heights (14-inch, 16-inch and 18-inch) with three glide options and 16 shell finishes, stacks 6 high.

Emoji™ 4-Leg Chair with Casters
Adjustable-height, mobile task chair available in 16 shell finishes.

Emoji™ Cantilever Chair
Available in child, youth and adult heights (12-inch, 14-inch, 16-inch and 18-inch) with three glide options and 16 shell finishes, stacks 6 high.

18" Frame

16" Frame

14"Frame

12" Frame

With education expanding far beyond the classroom, comfortable, supportive seating arrives to acknowledge the alternative learning environments. EMOJI™ Chairs and Stools provide a contemporary option. Available in multiple heights for a variety of students, and matching stools for the cafe, library or science lab. EMOJI™ Task Chair is the perfect complement for the student seating, and provides the teacher adjustable heights for quick configuration to accommodate different groups and settings.

- Stable: Glide option supports stationary installations and come in nylon, metal and felt options for any flooring type.
- Mobile: Casters allow for ease of mobility.
- Durable: Frame finished with powder paint over cold rolled steel for durability.
- Options: Available in 12", 14", 16" and 18" seat heights.
- Adjustable Height: EMOJI™ Task Chair and Lab Stool provide height adjustability on the fly to support students and desks of all heights.
- MAS certified product.

SPECIFICATION INFORMATION

FRAME

Cantilever frame is constructed with 1" diameter, 11 gauge tubular steel supported by 14 gauge steel brackets. 4-Leg frame is constructed using 14 gauge steel.

PLASTIC SEAT AND BACK

Composed of flexible polypropylene shell for open seating posture that promotes greater ergonomics. Chamfered seat edge relieves pressure on user's legs.

PLASTIC BASE

The task chair base is 22" in diameter. The lab stool base is 24" in diameter. The foot ring on the lab stool is 18" in diameter.

PNEUMATIC LIFT

The pneumatic lift in both the task chair and lab stool is a gas lift cylinder.

CASTERS OR GLIDES

Casters are 2" twin wheel, hard plastic, nonmarring casters and come in a black finish.

Glides are available in nylon, metal or felt. Nylon glides are neutral color. Metal glides are chrome color. Felt glides are white color. The glide material should be chosen based on floor type. Use the following chart to select the right material for your floor type.

COMPLIANCE

The READY™ Chairs & Stools meet the acceptance level criteria for ANSI/BIFMA X5.5-2017 Chair Test Standard using the following test program.

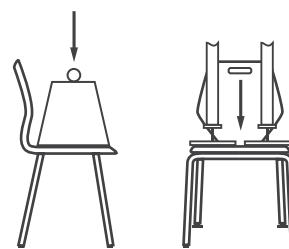

Rest Strength-Non-Tilt Test

There was no loss of serviceability of the chair with a static load of 150 lbf. and 250 lbf.

Drop-Dynamic Test

There was no breakage or loss of serviceability of the chair with a functional load of 225 lbs or proof load of 300 lbs.

Seating Durability Test

There was no loss of serviceability to the chair after completion of both the Impact and Load Ease Tests.

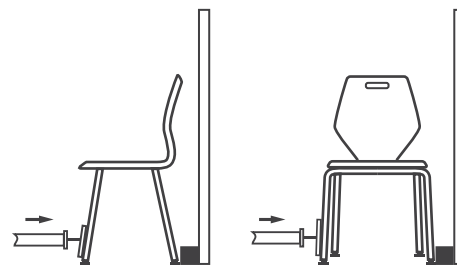

Stability Test

The chair remained stable and did not tip with force application of 20.2 lbf. to tip on the front and 49.6 lbf. to tip on the rear.

Backrest Durability-Non-Tilt Test

No structural breakage or loss of serviceability of the chair after 120,000 cycles.

Leg Strength Test

No structural breakage or loss of serviceability of the chair, including stacking with front to rear leg and side load applications.

COMPLIANCE

The READY™ Chairs & Stools meet the acceptance level criteria for ANSI/BIFMA X5.5-2017 Chair Test Standard using the following test program.

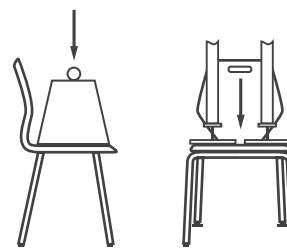

Rest Strength-Non-Tilt Test

There was no loss of serviceability of the chair with a static load of 150 lbf. and 250 lbf.

Drop-Dynamic Test

There was no breakage or loss of serviceability of the chair with a functional load of 225 lbs or proof load of 300 lbs.

Seating Durability Test

There was no loss of serviceability to the chair after completion of both the Impact and Load Ease Tests.

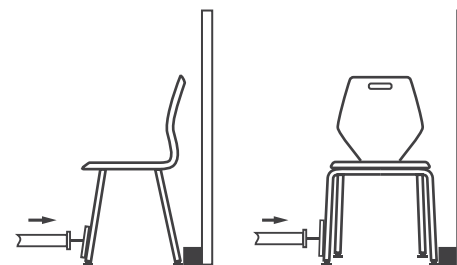

Stability Test

The chair remained stable and did not tip with force application of 20.2 lbf. to tip on the front and 49.6 lbf. to tip on the rear.

Backrest Durability-Non-Tilt Test

No structural breakage or loss of serviceability of the chair after 120,000 cycles.

Leg Strength Test

No structural breakage or loss of serviceability of the chair, including stacking with front to rear leg and side load applications.
