## TABLE OF CONTENTS

### MOTIV® Modular Soft Seating ..... P 4

Single Chair Armed with or without Tablet and/or Power on Right

Single Chair Armless with or without Tablet and/or Power on Right or Left

Single Chair Armed with or without Tablet and/or Power on Left

Single Bench with or without Laminate Top

30" Bench with or without Laminate Top

60" Bench with or without Laminate Top

90" Bench with or without Laminate Top

Double Bench with or without Laminate Top

### MOTIV® Freestanding Soft Seating ..... P12

Single Chair Armless with or without Tablet and/or Power on Right or Left

Single Chair Armed or Armless with Casters

Two and Three-Seat Sofa Armless with or without Tablets and/or Power on Right and Left

Single Chair Armed with or without Tablet and/or Power on Right or Left with or without Casters

Stool Available at 15" or 20" height with Casters or Glides

Two and Three-Seat Sofa Armed with or without Tablets and/or Power on Right and Left

Single and Double Wall Bench

Midback Sofa with or without Power on Right and Left, Front and Back, with or without Shelf

Highback Sofa with or without Power on Right and Left, Front and Back, with or without Shelf

### MOTIV® Occasional Tables ..... P24

MOTIV® Occasional Tables are complementary to MOTIV® Soft Seating. Tables come in a laminate top and are offered in round, rectangle, or square shapes.

# MOTIV® MODULAR SOFT SEATING

Put soft seating into an open area and watch interaction happen. With 120V and USB power options in any configuration, students can readily access information and each other to collaborate effectively. A range of modular options piece together to form the shape, grouping and energy desired.

- **Seating Options:** Comfortable armed or armless chairs. A variety of benches. We have a solution that's right for you.
- **Fabric Options:** Select from our wide variety of fabrics and leathers to create the ideal look for your space.
- **Power:** Optional 120V and USB power plates for chairs.

## SPECIFICATION INFORMATION

### CUSHIONING

Foam cushioning is engineered from polyurethane laminated panels for firmness, support, and comfort. Cushioning is certified to meet California Code 117. When covered in leather, sofas will have visible seams. Long benches and sofas will have one visible seam on vertical panel.

### FRAME

A series of engineered 23/32" CC X plywood sections and panels are assembled to form a strong and supportive frame. All joints are glued and mechanically fastened. Engineered sheet webbing is stretched across the seat portion of the frame for flexible support. The foam is adhered to the wood structure and webbing. Fabric or leather is precision cut and upholstered cover is sewn by computer controlled machines. All steps ensure consistency from one model to another. All components used in the manufacturing of Paragon Furniture seating meet State of California Technical Bulletin 117 for fire retardancy. Seating that must meet California 133 is available by special order.

### BASE

Base legs are constructed with 14-gauge flat oval tubing, which is formed using a CNC tube bender and features arc welded connections to the mounting plate. The leg assembly mounts to the underside of the seat with (3) 5/16-18 threaded bolts. Base legs can be finished in flannel (F), titanium (T), cool gray (O), wisdom (Z), black (B) Paragon Furniture standard powder paints. Plastic glides are utilized with all MOTIV® soft seating pieces.

### TABLET

Tablet measures 15 1/2" L x 14 3/4" W (39.37cm x 37.47cm), tapering to 10" L (25.40cm) on the small side. Tablet connects to tablet mechanism via an articulating mounting plate, allowing for full 360° rotation. Tablet comes standard with plastic cup holder that attaches to tablet mechanism directly beneath tablet. Cup holder is always finished in black.

### TABLET MECHANISM

Tablet mechanism is a 1 1/4" anodized aluminum pivot pole that attaches to frame of soft seating unit with two (2) 5/16 - 18 x 3 1/4" socket head bolts. Metal components are finished in aluminum.

### BENCH AND POWER BRIDGE FINISH OPTIONS

30, 60 and 90 degree benches can be constructed with all fabric on sides and top or be constructed with fabric sides and a hard worksurface top. Power bridges can only be specified with painted sides and a laminate top.

### BENCH AND POWER BRIDGE WORK SURFACE EDGE DETAIL

Benches and power bridges specified with laminate tops will feature edge detail, a 22.5. knife profile with a clear coat finish on exposed MDF.

### POWER

Power modules include one AC Power (120V) unit and one USB unit. USB power receptacle features technology which allows it to detect the amount of charge that is required by a given mobile device and supply only what is needed, up to a full charge rate of 2.1 amps.

Power modules are available as a stand alone NEMA cord that plugs directly into the wall or as a daisy chain system that connects multiple modules off a single power source. Stand alone power modules are UL Listed and daisy chain power modules are UL Recognized and require the additional purchase of jumper cables and power in-feed manager. Stand alone power modules are rated for a maximum of 15 amps each, daisy chain power modules are rated for a maximum of 12 amps for the system.

Power module face plate offered in one finish option; Flannel (F). Power bridge power units include two complete modules comprised of one AC Power (120V) unit and one USB unit. Power cords exit MOTIV® chairs and benches and power bridges from the bottom located in the center back. Power cords are approximately 13 feet in length. All models of MOTIV® modular soft seating that include power include a cord bin. Modular soft seating that does not include power require the cord bin to be specified at time of order. Not For Use With GFCI Outlets - To avoid tripping of electrical circuits, only use Daisy chain Power components with non-GFCI (Ground Fault Circuit Interrupter) outlets.

### POWER DOME

Benches with a laminate top are available with a 4-outlet power dome that provides access above the work surface. The power dome includes two 12' power cords that plug into a standard outlet or into a daisy chain power strip on daisy chain models. Power dome units are included with the order of the bench.

### DIMENSIONS

Additional dimensions for chairs and sofas are as following:

Arm height: 26"  
Seat height: 18"  
Seat depth: 20"  
Back height from seat: 36"  
Width between arms on chair: 21"  
Width between arms on a two seat sofa: 55"  
Width between arms on a three seat sofa: 75"  
Tablet height: 29"

### ASSEMBLY

All MOTIV® ships fully assembled.

### FABRIC

Paragon Furniture Grade-In Program has been designed to offer a host of benefits to customers for all Paragon Furniture upholstered products. Paragon Furniture has partnered with Momentum Group to offer hundreds of options that are now graded into Paragon Furniture price list. Customers simply pick a graded fabric, vinyl or leather pattern, grade and color, place an order with Paragon Furniture and Paragon Furniture will take care of everything else.

Material testing is no longer required. Color options as well as samples can be viewed and ordered through the Momentum Group's website at [themomgroup.com](http://themomgroup.com). Multiple colors and pattern matching will require an upcharge. Customer Owned Material (COM) and Customer Owned Leather (COL) orders are still welcome. Neither COM nor COL materials are required to be tested, however customers will need to purchase their own material and send it directly to Paragon Furniture for the manufacturing process. Paragon Furniture offers all Momentum Textiles as a standard. Loomsource and Textus are not offered as a Paragon Furniture standard.

### PATTERN ALIGNMENT AND MATCH

As a standard, fabric patterns will be aligned. For example, vertical stripes on the seat back will connect with the vertical stripes on the seat pan. Pattern match is when the pattern alignment applies to both vertical and horizontal lines throughout the entire sofa. Think plaids. The stripes have to match the seat back, the seat pan, and the inside of the arms. It is difficult (sometimes impossible) to achieve a perfect match in both directions and at every seam. When pattern matching is required, an upcharge is applied. We have provided on the following page a pattern repeat matrix to determine yardage. Alignment and matching will demand more fabric usage than is typically necessary with a solid color fabric.

### FIRE CODES

All Paragon Furniture standard soft seating meets California TB117. Contact Customer Care for more information on California TB133. The customer will have to purchase one of any item being ordered to be subjected to the burn certification test, plus a fee for the test.

### OPTION FOR CAL133 COMPLIANT

Item is produced with process and materials that meet the standard. An upcharge based on product, is applied.

### OPTION FOR CAL133 CERTIFIED

Requires customer to purchase one of each item to be certified. An upcharge for each test is applied.

### WARRANTY

Visit [www.paragoninc.com](http://www.paragoninc.com) for the full warranty statement.

# MOTIV® SEATING & TABLES

## MOTIV® MODULAR SOFT SEATING

### Repeat Pattern and Fabric and Leather Requirements

Soft Seating models come standard using one upholstered fabric or leather. **Models specified with two or more fabrics or leathers, an upcharge of 10% is applied to the net price of the product.**

Fabric yardage requirements are based on plain 54" material. Leather requirements are shown in square feet and are based on hides that average a minimum of 50 to 55 square feet each.

Additional fabric or leather is required to match any pattern with matching repeats. For 54" material with a fabric pattern repeat, increase the fabric yardage requirements by the factor shown in the charts below. To determine fabric repeat pattern add the horizontal and the vertical measurements together.

The total of the horizontal and vertical measurements should then be cross referenced to the **Fabric Repeat Pattern Cut** charts below. **Increase the Fabric Requirement By** the percentage indicated for that corresponding **Fabric Repeat Pattern Cut**. Increase leather footage requirements 15% when using hides smaller than 50 square feet.

### Fabric and Leather Requirements

MOTIV® Modular Soft Seating	Description	Fabric	Leather
EDUMS300	Armless Chair	3 yds	54 sq ft
EDUMD560L	Chair Left Arm	4 yds	72 sq ft
EDUMD560R	Chair Right Arm	4 yds	72 sq ft
EDUMS350	Arm Chair	5 yds	90 sq ft
EDUMDB630	30° Bench	3.5 yds	36 sq ft
EDUMDB630W	30° Bench with Laminate Top	2 yds	36 sq ft
EDUMDB660	60° Bench	4 yds	72 sq ft
EDUMDB660W	60° Bench with Laminate Top	2.5 yds	45 sq ft
EDUMDB690	90° Bench	5 yds	90 sq ft
EDUMDB690W	90° Bench with Laminate Top	3.5 yds	63 sq ft
EDUMDB400	Single Bench	2.5 yds	45 sq ft
EDUMDB400W	Single Bench with Laminate Top	1.5 yds	35 sq ft
EDUMDB600	Double Bench	3.5 yds	63 sq ft
EDUMDB600W	Double Bench with Laminate Top	2.5 yds	45 sq ft

This matrix applies only to solid fabrics or fabrics with a railroaded stripe (stripes or pattern running across the roll, see Fig. 1). Any fabric pattern requiring two-way alignment, pattern matching, or special pattern location will require additional fabric and must be submitted to determine usage requirements. Yardage requirements are based on 54" wide roll goods.

### Repeat Pattern Requirements

- Unit requires the additional purchase of power infeed cables and jumper cables

# MOTIV® FREESTANDING SOFT SEATING

Put soft seating into an open area and watch interaction happen. With 120V and USB power options in any configuration, students can readily access information and each other to collaborate effectively.

- **Seating Options:** Comfortable armed or armless chairs. A variety of benches. We have a solution that's right for you.
- **Fabric Options:** Select from our wide variety of fabrics and leathers to create the ideal look for your space.
- **Power:** Optional 120V and USB power plates for chairs.

## SPECIFICATION INFORMATION

### CUSHIONING

Foam cushioning is engineered from polyurethane laminated panels for firmness, support, and comfort. Cushioning is certified to meet California Code 117. When covered in leather, sofas will have visible seams. Long benches and sofas will have one visible seam on vertical panel.

### FRAME

A series of engineered 23/32" CC X plywood sections and panels are assembled to form a strong and supportive frame. All joints are glued and mechanically fastened. Engineered sheet webbing is stretched across the seat portion of the frame for flexible support. The foam is adhered to the wood structure and webbing. Fabric or leather is precision cut and upholstered cover is sewn by computer controlled machines. All steps ensure consistency from one model to another. All components used in the manufacturing of Paragon Furniture seating meet State of California Technical Bulletin 117 for fire retardancy. Seating that must meet California 133 is available by special order.

### BASE

Base legs are constructed with 14-gauge flat oval tubing, which is formed using a CNC tube bender and features arc welded connections to the mounting plate. The leg assembly mounts to the underside of the seat with (3) 5/16-18 threaded bolts. Base legs can be finished in flannel (F), titanium (T), cool gray (O), wisdom (Z), black (B) Paragon Furniture standard powder paints. Plastic glides are utilized with all MOTIV® soft seating pieces.

### TABLET

Tablet measures 15 1/2"L x 14 3/4"W (39.37cm x 37.47cm), tapering to 10"L (25.40cm) on the small side. Tablet connects to tablet mechanism via an articulating mounting plate, allowing for full 360° rotation. Tablet comes standard with plastic cup holder that attaches to tablet mechanism directly beneath tablet. Cup holder is always finished in black.

### TABLET MECHANISM

Tablet mechanism is a 1 1/4" anodized aluminum pivot pole that attaches to frame of soft seating unit with two (2) 5/16 - 18 x 3 1/4" socket head bolts. Metal components are finished in aluminum.

### WALL BENCH FINISH OPTIONS

Benches can be constructed with all fabric on sides and top. Legs can be finished in any standard powder paint offered by Paragon Furniture. Note the Wall Bench is 20"D and does not coordinate with MOTIV® Double Sided Benches; Power Bridge; Chairs and Sofas.

### POWER BRIDGE

The modular Power Bridge is available for use with MOTIV® Freestanding chairs, see MOTIV® Modular Soft Seating for specifications.

The Power Bridge is unable to be used with MOTIV® seating that incorporates casters or MOTIV® Sofas with tablet arms. The Power Bridge is an option for chairs that utilize a tablet arm but must be attached to the opposite side.

### POWER

Power modules include one AC Power (120V) unit and one USB unit. USB power receptacle features Detect-Supply-Charge™ (DSC™) technology which allows it to detect the amount of charge that is required by a given mobile device and supply only what is needed, up to a full charge rate of 2.1 amps.

Power modules are UL Listed. Power modules are rated for a maximum of 15 amps each; however, to prevent nuisance tripping of the breaker, you should not exceed 12 amps of usage each for an extended period of time. Power module face plate offered in four different finish options: Flannel (F). Power cords exit MOTIV® chairs and benches and power bridges from the bottom located in the center back. Power cords are approximately 13 feet in length. All models of MOTIV® modular soft seating, whether specified with power or without, include a cord bin to manage cords.

### DIMENSIONS

Additional dimensions for chairs and sofas are as following:

Arm height: 26"  
Seat height: 18"  
Seat depth: 20"  
Back height from seat: 36"  
Width between arms on chair: 21"  
Width between arms on a two seat sofa: 55"  
Width between arms on a three seat sofa: 75"  
Width between arms on highback and midback two seat sofa: 50"  
Tablet height: 29"

### ASSEMBLY

All MOTIV® ships fully assembled.

### FABRIC

Paragon Furniture Grade-In Program has been designed to offer a host of benefits to customers for all Paragon Furniture upholstered products. Paragon Furniture has partnered with Momentum Group to offer hundreds of options that are now graded into Paragon Furniture price list. Customers simply pick a graded fabric, grade and color, place an order with Paragon Furniture and Paragon Furniture will take care of everything else.

Material testing is no longer required. Color options as well as samples can be viewed and ordered through the Momentum Group's website at [themomgroup.com](http://themomgroup.com).

Multiple colors and pattern matching will require an upcharge. Customer Owned Material (COM) and Customer Owned Leather (COL) orders are still welcome. Neither COM nor COL materials are required to be tested, however customers will need to purchase their own material and send it directly to Paragon Furniture for the manufacturing process. Paragon Furniture offers all Momentum Textiles as a standard. Loomsource and Textus are not offered as a Paragon Furniture standard.

### PATTERN ALIGNMENT AND MATCH

As a standard, fabric patterns will be aligned. For example, vertical stripes on the seat back will connect with the vertical stripes on the seat pan. Pattern match is when the pattern alignment applies to both vertical and horizontal lines throughout the entire sofa. Think plaids. The stripes have to match the seat back, the seat pan, and the inside of the arms. It is difficult (sometimes impossible) to achieve a perfect match in both directions and at every seam. When pattern matching is required, an upcharge is applied. We have provided on the following page a pattern repeat matrix to determine yardage. Alignment and matching will demand more fabric usage than is typically necessary with a solid color fabric.

### FIRE CODES

All Paragon Furniture standard soft seating meets California TB117. Contact Customer Care for more information on California TB133. The customer will have to purchase one of any item being ordered to be subjected to the burn certification test, plus a fee for the test.

### OPTION FOR CAL133 COMPLIANT

Item is produced with process and materials that meet the standard. An upcharge based on product, is applied.

### OPTION FOR CAL133 CERTIFIED

Requires customer to purchase one of each item to be certified. An upcharge for each test is applied.

### WARRANTY

Visit [www.paragoninc.com](http://www.paragoninc.com) for the full warranty statement.

# MOTIV® SEATING & TABLES

## MOTIV® FREESTANDING SOFT SEATING

### Repeat Pattern and Fabric and Leather Requirements

Soft Seating models come standard using one upholstered fabric. Models specified with two or more fabrics, an upcharge of 10% is applied to the net price of the product.

Fabric yardage requirements are based on plain 54" material. Leather requirements are shown in square feet and are based on hides that average a minimum of 50 to 55 square feet each.

Additional fabric or leather is required to match any pattern with matching repeats. For 54" material with a fabric pattern repeat, increase the fabric yardage requirements by the factor shown in the charts below. To determine fabric repeat pattern add the horizontal and the vertical measurements together. The total of the horizontal and vertical measurements should then be cross referenced to the **Fabric Repeat Pattern Cut** charts below. **Increase the Fabric Requirement By** the percentage indicated for that corresponding **Fabric Repeat Pattern Cut**. Increase leather footage requirements 15% when using hides smaller than 50 square feet.

### Fabric and Leather Requirements

MOTIV® Modular Soft Seating	Description	Fabric	Leather
EDUMS300 and EDUMB600	Armless Chair	3 yds	54 sq ft
EDUMS350 and EDUMB650	Arm Chair	5 yds	90 sq ft
EDUML400	Armless Two Seat Sofa	6 yds	108 sq ft
EDUML450	Armed Two Seat Sofa	6.5 yds	117 sq ft
EDUMC500	Armless Three Seat Sofa	7.5 yds	135 sq ft
EDUMC550	Armed Three Seat Sofa	8 yds	144 sq ft
EDUMWB400	Single Wall Bench	2.5 yds	45 sq ft
EDUMWB600	Double Wall Bench	3 yds	54 sq ft
EDUMH450	Highback Two Seat Sofa	11 yds	210 sq ft
EDUMM250	Midback Two Seat Sofa	10 yds	119 sq ft

This matrix applies only to solid fabrics or fabrics with a railroaded stripe (stripes or pattern running across the roll, see Fig. 1). Any fabric pattern requiring two-way alignment, pattern matching, or special pattern location will require additional fabric and must be submitted to determine usage requirements. Yardage requirements are based on 54" wide roll goods.

### Repeat Pattern Requirements

Fabric Repeat Pattern Cut Across Roll	Increase Fabric Requirement By
1" - 5"	10%
