

# CROSSFIT FLIP TOP STUDENT DESK FAQ

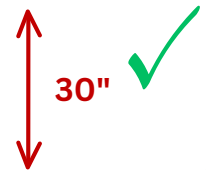

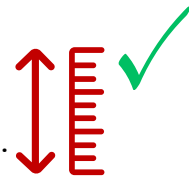

A flexible solution that is easily reconfigurable for the needs of the moment.

Paragon's Crossfit Flip Top Student Desks are built to keep classrooms moving with ease. Designed for mobility, flexibility, and durability, these desks adapt seamlessly to different teaching and learning styles. With a flip-top design and rugged construction, they make it simple to rearrange, store, and reconfigure your space, empowering students and teachers alike.

## Product Details:

- Desks that are 20" deep and 24" deep will always be height adjustable.
- Desks that are 30" deep will always be fixed height for structural stability reasons.
- We cannot make anything deeper than 30". This was tested during product development. Tops deeper than 30" do not flip and are not stable.
- We cannot make anything wider than 60". This was tested during product development. Tops wider than 60" are not stable.
- We do not add power cut outs because the spine interferes with placement and is a pinch point for the power cord.
- We cannot add a modesty panel or wire management.
- We tested all the other student desk shapes during product development and only the rectangle, koi, and half-circle "d" shapes were approved. Other shapes do not flip or are not stable.
