CHAIRS & SEATING

EMOJI™ SEATING

EMOJI™ seating helps create a delightful experience for children & a refined, performance driven experience for adults. Each piece is designed to support us in how we move & find comfort at various ages as well as how we evolve from seeking playfulness to focus. Four sizes cover all ages & hold characteristics specific to the physical & skeletal needs of each.

FEATURES

◻ SHELL & FRAME

Seats are constructed using a semi gas-assisted process resulting in a lightweight, one-piece, plastic shell. Attached to the plastic shell is a welded steel, powder-coated, 1" round tube frame. 4 leg chair frames are 14-gauge, 0.074 thick steel. Cantilever chair frames are 12-gauge, 0.120 thick steel.

◻ RUBBER BUMPERS

The underside of the shell is designed with rubber bumpers to protect chairs & surfaces from being scratched when stacked.

◻ TWO BASE OPTIONS

Available in two base options: 4 leg & cantilever.

◻ STACKING

Chairs stack up to five to allow for easy, compact storage.

◻ COLORS

Available in 16 plastic & 5 frame paint colors.

◻ GLIDES OR CASTERS

4 leg seating is offered in glides or casters. Glide bottom material should be selected based on flooring type.

◻ A CHAIR FOR EVERY AGE

At every age, EMOJI™ Seating is designed to support us. The support structure of the adult chair more closely mimics the grown-up spine & pelvis.

◻ CHAIR WEIGHT CAPACITY

Our Chairs are tested to meet Business and Institutional Furniture Manufacturers Association (BIFMA) standards the industry benchmark for furniture safety, durability, and structural performance. This testing helps ensure the chairs perform as intended in demanding environments such as classrooms and other educational settings when used appropriately.

SENSORY ERGONOMICS

The human perception of comfort is affected by every aspect of our environment. EMOJI™ features & details were designed to generate a sensory response.

◻ TEXTURE

We see with our hands. This means that what we touch & feel has a major effect on how we respond to things. Cold, rough, & sharp textures are all interpreted as uninviting conditions. EMOJI™ has textured zones to hold you firmly in your seat while you're sitting down & to keep rough areas away from where you touch. The human brain also responds exceptionally well when presented with a single, obvious place or method to grab, hold, or move something. The EMOJI™ handle is a critical gesture of empathy to the human brain.

◻ COLOR CONNECTION

Color can be used scientifically in architecture to promote certain types of behaviors or emotions in an environment. The human eye & brain can interpret color & generate

an emotional or physical response based on the color itself. Bright primary colors, neons, & bright multicolored patterns will generate excitement, increase awareness of overall surroundings, & heighten the mind's production of chemicals that increase energy & activity. Muted colors & monochromatic environments have the opposite effect. They trigger the release of chemicals in the brain that will promote relaxation & calm.

◻ SOUND

Sound is an unlikely, but major source of disruption. Additionally, ambient noise is constantly requiring the ears & brain to interpret sound, which leads to fatigue by the end of the day. EMOJI™ uses rubber bumpers & quiet casters to minimize distraction.
